

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SEI Dynamic Factor Allocation Fund, a sub-fund of SEI Global Master Fund PLC (the "Company")

U.S. \$ Institutional Distributing share class -- ISIN IE000X7ZA590

Management Company: SEI Investments Global, Limited, part of the SEI group of companies

Objectives and Investment Policy

- The objective of the Fund is to provide long-term growth of capital and income.
- The Fund will primarily invest in listed companies (equity securities) globally.
- The Fund may also invest in companies listed or traded in Emerging Market Countries as well as up to 10% of its assets in funds.
- The performance and risk of the Fund are actively managed in reference to a benchmark index, the MSCI World Index (the Benchmark). The Fund aims to outperform the Benchmark over time and does not intend to track it. The Fund will invest significantly in securities within the Benchmark but the Fund is not constrained by the Benchmark and may invest in instruments which are not included in the Benchmark.
- The Investment Adviser actively manages the Fund by utilising a Factor based investment process that aims to select the most attractive equity securities based on their exposure to Factor families such as value, momentum, quality and low volatility. The allocation to each Factor family and its comprising components is dynamically managed and adjusted based on the Investment Advisers forward looking estimates of Factors risks and returns. The Fund strives to achieve the investment objective whilst promoting environmental and social characteristics within the meaning of Article 8 of SFDR. Further details in this respect are included in the prospectus.
- The Fund may use derivatives (an instrument that derives its value from another underlying asset) in an attempt to reduce risk, reduce costs and to generate additional income.
- The base currency of the Fund is U.S. Dollars. If the share class currency differs from this then its value may be affected by exchange rate movements. Hedged share classes attempt to reduce this effect but may also exclude the benefits of positive exchange rate movement.
- Shareholders may redeem or exchange shares on demand on any dealing day. A dealing day for this Fund is any business day for the New York Stock Exchange and for banks in either Dublin or London except 24 December.
- Income generated by the Fund is retained within the NAV (net asset value of the Fund) for accumulating classes and distributed from the NAV for distributing classes.
- Further information is available in the Prospectus.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data may not be a reliable indicator for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean "risk free".
- The Fund is in category 6 because its NAV or simulated return using a representative benchmark has experienced high volatility historically due to the type of investments that it is permitted to hold as well as the various risks that the Fund may be exposed to.
- For further details of the risks, please refer to the Fund's prospectus.

- Equities are subject to material market risk. Their values tend to be volatile and can decline quickly or over extended periods of time.
- Derivatives can amplify share price volatility by increasing the Fund's sensitivity to underlying risks such as market, interest rate and credit. Derivatives may expose the Fund to credit risks of counterparties, who may not meet payment obligations. Volatility from derivatives may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so.
- Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

Charges

The charges you pay are used to pay the costs of running the Fund including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:

Entry charge 0%

Exit charge Up to 3%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. The exit charge is a levy on large redemptions and is retained by the Fund.

Charges taken from the Fund over a year

Ongoing charge 0.12%

Charges taken from the fund under certain specific conditions:

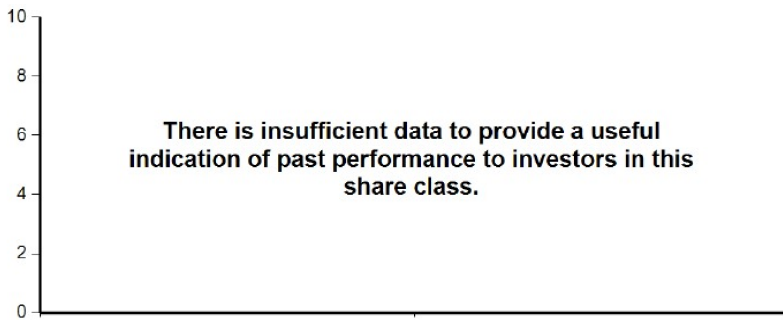

Performance fee None

The **entry** and **exit** charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The **ongoing** charges figure is based on expenses for the year ending 31 December 2023. If the share class launched after this date then this figure is an estimate of the charges. This figure may vary from year to year and excludes portfolio transaction costs.

For more information about charges, please see the Fees & Expenses section of the Fund's prospectus which is available at <http://www.seic.com/DublinFundDocs>

Past Performance

* MSCI World Index (Net) (USD)

The Fund does not intend to track the performance of the Benchmark.

To provide a more meaningful comparison against the performance of the share class a relevant sub-set of the Benchmark has been provided above.

The past performance of the Fund should not be viewed as a guide to future performance.

The calculation of past performance is net of all charges and fees payable by the Fund.

The Fund was launched in August 2023 and this share class was launched in September 2023.

The past performance has been calculated in the currency of the share class.
