# SEMI-ANNUAL REPORT

## SEI Daily Income Trust

- › Government Fund
- › Government II Fund
- › Treasury II Fund
- › Ultra Short Duration Bond Fund
- › Short-Duration Government Fund
- › GNMA Fund

*Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Funds' shareholder reports like this one will no longer be sent by mail, unless you specifically request paper copies of the reports from the Funds or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.*

*If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Funds electronically by contacting your financial intermediary.*

*You may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can follow the instructions included with this disclosure, if applicable, or you can contact your financial intermediary to inform it that you wish to continue receiving paper copies of your shareholder reports. If you invest directly with the Funds, you can inform the Funds that you wish to continue receiving paper copies of your shareholder reports by calling 1-800-DIAL-SEI. Your election to receive reports in paper will apply to all funds held with the SEI Funds or your financial intermediary.*

## TABLE OF CONTENTS

Schedules of Investments	1
Statements of Assets and Liabilities	36
Statements of Operations	38
Statements of Changes in Net Assets	40
Financial Highlights	44
Notes to Financial Statements	46
Disclosure of Fund Expenses	58
Liquidity Risk Management Program	60
Board of Trustees' Considerations in Approving the Advisory Agreement	61

*The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarter of each fiscal year on Form N-PORT. The Trust's Forms N-PORT are available on the Commission's website at <http://www.sec.gov>.*

*Since the Funds in SEI Daily Income Trust typically hold only fixed income securities, they generally are not expected to hold securities for which they may be required to vote proxies. Regardless, in light of the possibility of the possibility that a Fund could hold a security for which a proxy is voted, the Trust has adopted proxy voting policies. A description of the policies and procedures that the Trust uses to determine how to vote proxies relating to portfolio securities, as well as information relating to how a Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, is available (i) without charge, upon request, by calling 1-800-DIAL-SEI; and (ii) on the Commission's website at <http://www.sec.gov>.*

**SCHEDULE OF INVESTMENTS (Unaudited)**

July 31, 2020

**Government Fund**

Sector Weightings <sup>†</sup>:

38.1% U.S. Government Agency Obligations

36.7% Repurchase Agreements

25.2% U.S. Treasury Obligations

<sup>†</sup>Percentages are based on total investments.

A list of the open futures contracts held by the Fund at July 31, 2020, is as follows:

Type of Contract	Number of Contracts Long/(Short)	Expiration Date	Notional Amount (Thousands)	Value (Thousands)	Unrealized Appreciation (Depreciation) (Thousands)
U.S. 10-Year Treasury Notes	(15)	Sep-2020	\$ (2,080)	\$ (2,101)	\$ (21)
U.S. 2-Year Treasury Notes	77	Oct-2020	17,000	17,016	16
U.S. 5-Year Treasury Notes	(1)	Oct-2020	(125)	(126)	(1)
U.S. Long Treasury Bond	(1)	Sep-2020	(177)	(183)	(6)
			<u>\$ 14,618</u>	<u>\$ 14,606</u>	<u>\$ (12)</u>

For the period ended July 31, 2020, the total amount of all open futures contracts, as presented in the table above, are representative of the volume of activity for this derivative type during the period.

Percentages are based on Net Assets of \$314,463 (\$ Thousands).

- (A) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration normally to qualified institutions. On July 31, 2020, the value of these securities amounted to \$130,900 (\$ Thousands), representing 41.6% of the Net Assets of the Fund.
- (B) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets.
- (C) Variable or floating rate security, the interest rate of which adjusts periodically based on prevailing interest rates.
- (D) Security, or portion thereof, has been pledged as collateral on open futures contracts.
- (E) Zero coupon security. The rate shown on the Schedule of Investments is the security's effective yield at the time of purchase.
- (F) Tri-Party Repurchase Agreement.

ARM — Adjustable Rate Mortgage  
 CI — Class  
 CLO — Collateralized Loan Obligation  
 FFCB — Federal Farm Credit Bank  
 FHLMC — Federal Home Loan Mortgage Corporation  
 FMAC — Freddie Mac  
 FNMA — Federal National Mortgage Association  
 GNMA — Government National Mortgage Association  
 GO — General Obligation  
 ICE — Intercontinental Exchange  
 LIBOR — London Interbank Offered Rate  
 LLC — Limited Liability Company  
 MTN — Medium Term Note  
 PLC — Public Limited Company  
 RB — Revenue Bond  
 REMIC — Real Estate Mortgage Investment Conduit  
 Ser — Series  
 USD — U.S. Dollar  
 VAR — Variable Rate

The following is a summary of the inputs used as of July 31, 2020 in valuing the Fund's investments and other financial instruments carried at value (\$ Thousands):

Investments in Securities	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	Total (\$)
Corporate Obligations	—	113,381	—	113,381
Asset-Backed Securities	—	105,227	—	105,227
Mortgage-Backed Securities	—	48,586	—	48,586
U.S. Treasury Obligations	—	12,100	—	12,100
U.S. Government Agency Obligations	—	10,121	—	10,121
Municipal Bonds	—	10,080	—	10,080
Commercial Paper	—	8,397	—	8,397
Sovereign Debt	—	2,369	—	2,369
Repurchase Agreement	—	3,600	—	3,600
Total Investments in Securities	—	313,861	—	313,861

Other Financial Instruments	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	Total (\$)
Futures Contracts*				
Unrealized Appreciation	16	—	—	16
Unrealized Depreciation	(28)	—	—	(28)
Total Other Financial Instruments	<u>(12)</u>	<u>—</u>	<u>—</u>	<u>(12)</u>

\* Futures Contracts are valued at the net unrealized appreciation (depreciation) on the instruments.

For the period ended July 31, 2020, there were no transfers in or out of Level 3.

For more information on valuation inputs, see Note 2 — Significant Accounting Policies in Notes to Financial Statements.

A list of the open futures contracts held by the Fund at July 31, 2020, is as follows:

Type of Contract	Number of Contracts Long/(Short)	Expiration Date	Notional Amount (Thousands)	Value (Thousands)	Unrealized Appreciation (Depreciation) (Thousands)
U.S. 10-Year Treasury Note	204	Sep-2020	\$ 28,424	\$ 28,576	\$ 152
U.S. 2-Year Treasury Note	1,073	Oct-2020	236,824	237,116	292
U.S. 5-Year Treasury Note	242	Oct-2020	30,428	30,523	95
U.S. Long Treasury Bond	(57)	Sep-2020	(10,102)	(10,390)	(288)
Ultra 10-Year U.S. Treasury Note	(47)	Sep-2020	(7,381)	(7,485)	(104)
			<u>\$ 278,193</u>	<u>\$ 278,340</u>	<u>\$ 147</u>

For the period ended July 31, 2020 the total amount of all open futures contracts, as presented in the table above, are representative of the volume of activity for this derivative type during the period.

Percentages are based on Net Assets of \$806,624 (\$ Thousands).

- (A) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets.
- (B) Security, or portion thereof, has been pledged as collateral on open futures contracts.
- (C) Tri-Party Repurchase Agreement.

CI — Class

FHLMC — Federal Home Loan Mortgage Corporation

FNMA — Federal National Mortgage Association

GNMA — Government National Mortgage Association

ICE — Intercontinental Exchange

IO — Interest Only - face amount represents notional amount

LIBOR — London Interbank Offered Rate

REMIC — Real Estate Mortgage Investment Conduit

Ser — Series

TBA — To Be Announced

USD — U.S. Dollar

VAR — Variable Rate

The following is a summary of the inputs used as of July 31, 2020 in valuing the Fund's investments and other financial instruments carried at value (\$ Thousands):

Investments in Securities	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	Total (\$)
Mortgage-Backed Securities	—	589,238	—	589,238
U.S. Treasury Obligations	—	208,119	—	208,119
Repurchase Agreements	—	71,300	—	71,300
Total Investments in Securities	—	<u>868,657</u>	—	<u>868,657</u>
Other Financial Instruments	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	Total (\$)
Futures Contracts*				
Unrealized Appreciation	539	—	—	539
Unrealized Depreciation	(392)	—	—	(392)
Total Other Financial Instruments	<u>147</u>	—	—	<u>147</u>

\* Futures Contracts are valued at the net unrealized appreciation/(depreciation) on the instruments.

For the period ended July 31, 2020, there were no transfers in or out of Level 3.

For more information on valuation inputs, see Note 2 — Significant Accounting Policies in Notes to Financial Statements.

Amounts designated as “—” are \$0 or have been rounded to \$0.

The accompanying notes are an integral part of the financial statements.

11,000      11,000

A list of the open futures contracts held by the Fund at July 31, 2020, is as follows:

Type of Contract	Number of Contracts Long/(Short)	Expiration Date	Notional Amount (Thousands)	Value (Thousands)	Unrealized Appreciation (Depreciation) (Thousands)
U.S. 10-Year Treasury Note	(2)	Sep-2020	\$ (280)	\$ (280)	\$ —
U.S. 2-Year Treasury Note	22	Oct-2020	4,855	4,862	7
U.S. 5-Year Treasury Note	16	Oct-2020	2,009	2,018	9
U.S. Long Treasury Bond	(8)	Sep-2020	(1,422)	(1,458)	(36)
Ultra 10-Year U.S. Treasury Note	(6)	Sep-2020	(942)	(956)	(14)
			<u>\$ 4,220</u>	<u>\$ 4,186</u>	<u>\$ (34)</u>

For the period ended July 31, 2020, the total amount of all open futures contracts, as presented in the table above, are representative of the volume of activity for this derivative type during the period.

Percentages are based on Net Assets of \$92,407 (\$ Thousands).

- (A) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets.
- (B) Security, or portion thereof, has been pledged as collateral on open futures contracts.
- (C) Tri-Party Repurchase Agreement.

The following is a summary of the inputs used as of July 31, 2020 in valuing the Fund's investments and other financial instruments carried at value (\$Thousands):

Investments in Securities	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	Total (\$)
Mortgage-Backed Securities	—	88,212	—	88,212
Repurchase Agreements	—	12,400	—	12,400
Total Investments in Securities	<u>—</u>	<u>100,612</u>	<u>—</u>	<u>100,612</u>

Other Financial Instruments	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	Total (\$)
Futures Contracts*				
Unrealized Appreciation	16	—	—	16
Unrealized Depreciation	(50)	—	—	(50)
Total Other Financial Instruments	<u>(34)</u>	<u>—</u>	<u>—</u>	<u>(34)</u>

CI — Class  
 FHLMC — Federal Home Loan Mortgage Corporation  
 FMAC — Freddie Mac  
 FNMA — Federal National Mortgage Association  
 GNMA — Government National Mortgage Association  
 IO — Interest Only - face amount represents notional amount  
 REMIC — Real Estate Mortgage Investment Conduit  
 Ser — Series  
 TBA — To Be Announced  
 USD — U.S. Dollar  
 VAR — Variable Rate

\* Futures Contracts are valued at the net unrealized appreciation (depreciation) on the instruments.

For the period ended July 31, 2020, there were no transfers in or out of Level 3.

For more information on valuation inputs, see Note 2 — Significant Accounting Policies in Notes to Financial Statements.

Amounts designated as “—” are \$0 or have been rounded to \$0.

\* Per share calculations were performed using average shares.

@ For the six month period ended July 31, 2020. All ratios for the period have been annualized.

† Returns are for the period indicated and have not been annualized. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

(1) The Distributor and/or Administrator have voluntarily agreed to waive and reduce its fee and/or reimburse certain expenses of the Fund in order to limit the one-day net income yield of the Fund to not less than 0.01% of the Fund's average daily net assets of the share class. Had these waivers and the Treasury Guarantee Program expense been excluded the ratio would have been at the expense ratio cap figure. See Note 3 for expense ratio cap figure.

(2) Amount represents less than \$0.005 per share.

(3) Commenced operations on November 20, 2015. All ratios for the period have been annualized.

Amounts designated as “—” are zero or have been rounded to zero.

## 1. ORGANIZATION

SEI Daily Income Trust (the “Trust”) was organized as a Massachusetts business trust under a Declaration of Trust dated March 15, 1982.

The Trust is registered under the Investment Company Act of 1940, as amended, as a diversified, open-end investment company with six operational Funds: the Government, Government II, and Treasury II (each a “Fund,” collectively, the “Money Market Funds”), the Ultra Short Duration Bond, Short-Duration Government and GNMA (each a “Fund,” collectively, the “Fixed Income Funds”). The Trust is registered to offer: Class F shares of the Funds; and Class CAA shares of the Government Fund and Class Y shares of the Fixed Income Funds. The assets of each Fund are segregated, and a shareholder’s interest is limited to the Fund in which shares are held. The Funds’ prospectuses provide a description of each Fund’s investment objective and strategies.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The following are significant accounting policies, which are consistently followed in the preparation of its financial statements by the Funds. The Funds are investment companies that apply the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board (“FASB”).

**Use of Estimates** — The preparation of financial statements, in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”), requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

**Security Valuation** — Investment securities of the Money Market Funds are stated at amortized cost, which approximates market value. Under this valuation method, purchase discounts and premiums are accreted and amortized ratably to maturity and are included in interest income. The Money Market Funds’ use of amortized cost is subject to its compliance with certain conditions as specified by Rule 2a-7 of the 1940 Act.

Investment securities of the Fixed Income Funds listed on a securities exchange, market or automated quotation system for which quotations are readily available are valued at the last quoted sale price on an exchange or market on which they are traded, or, if there is no such reported sale, at the most recent quoted bid price. If available, debt securities are priced based upon valuations provided by independent third-party pricing

agents. Such values generally reflect the last reported sales price if the security is actively traded. The third party pricing agents may also value debt securities at an evaluated bid price by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Debt obligations with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value. Prices for most securities held in the Funds are provided daily by recognized independent pricing agents. If a security price cannot be obtained from an independent third-party pricing agent, the Fixed Income Funds seek to obtain a bid price from at least one independent broker.

Securities for which market prices are not “readily available” are valued in accordance with Fair Value Procedures established by the Trust’s Board of Trustees. The Trust’s Fair Value Procedures are implemented through a Fair Value Committee (the “Committee”) designated by the Funds’ Board of Trustees. Some of the more common reasons that may necessitate that a security be valued using Fair Value Procedures include: the security’s trading has been halted or suspended; the security has been de-listed from a national exchange; the security’s primary trading market is temporarily closed at a time when under normal conditions it would be open; or the security’s primary pricing source is not able or willing to provide a price. When a security is valued in accordance with the Fair Value Procedures, the Committee will determine the value after taking into consideration relevant information reasonably available to the Committee. As of July 31, 2020, there were no fair valued securities held by the Funds.

In accordance with U.S. GAAP, fair value is defined as the price that a Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. A three tier hierarchy has been established to maximize the use of observable and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing an asset. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances.

The three-tier hierarchy of inputs is summarized in the three broad Levels listed below:

Level 1 — Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that the Fund has the ability to access at the measurement date;

Level 2 — Quoted prices which are not active, or inputs that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and

Level 3 — Prices, inputs or exotic modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Investments are classified within the level of the lowest significant input considered in determining fair value. Investments classified within Level 3 whose fair value measurement considers several inputs may include Level 1 or Level 2 inputs as components of the overall fair value measurement.

For the period ended July 31, 2020, there have been no significant changes to the Trust's fair valuation methodologies.

**Security Transactions and Investment Income** — Security transactions are recorded on the trade date. Costs used in determining net realized capital gains and losses on the sale of securities are on the basis of specific identification. Dividend income is recognized on the ex-dividend date, and interest income is recognized using the accrual basis of accounting.

Distributions received on securities that represent a return of capital or capital gain are recorded as a reduction of cost of investments and/ or as a realized gain. The Trust estimates the components of distributions received that may be considered nontaxable distributions or capital gain distributions.

For the Fixed Income Funds, amortization and accretion is calculated using the scientific interest method, which approximates the effective interest method over the holding period of the security. Amortization of premiums and discounts is included in interest income.

For the Money Market Funds, all amortization is calculated using the straight line method over the holding period of the security. Amortization of premiums and accretion of discounts are included in interest income.

**Repurchase Agreements** — To the extent consistent with its investment objective and strategies, securities pledged as collateral for repurchase agreements are held by each Fund's custodian bank until the repurchase date of the repurchase agreement. The Funds also invest in tri-party repurchase agreements. Securities

held as collateral for tri-party repurchase agreements are maintained by the broker's custodian bank in a segregated account until the repurchase date of the repurchase agreement. Provisions of the repurchase agreements and the Trust's policies require that the market value of the collateral, including accrued interest thereon, is sufficient in the event of default by the counterparty. If the counterparty defaults and the value of the collateral declines, or if the counterparty enters into an insolvency proceeding, realization of the collateral by the Funds may be delayed or limited.

It is the Funds' policy to present the repurchase agreements contracts separately on the Statements of Assets and Liabilities, as the Funds do not have a master netting agreement with the counterparty to the repurchase agreements contracts. Refer to each Fund's Schedule of Investments for details regarding repurchase agreements contracts as of July 31, 2020, if applicable.

**Futures Contracts** — To the extent consistent with its investment objective and strategies, the Fixed Income Funds utilized futures contracts during the period ended July 31, 2020. These Funds' investments in futures contracts are designed to enable the Funds to more closely approximate the performance of their benchmark indices. The Funds chose to invest in futures contracts for tactical hedging purposes as well as to enhance the Funds' returns. Initial margin deposits of cash or securities are made upon entering into futures contracts. The contracts are marked to market daily and the resulting changes in value are accounted for as unrealized gains and losses. Variation margin payments are paid or received, depending upon whether unrealized gains or losses are incurred. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the amount invested in the contract.

Risks of entering into futures contracts include the possibility that there will be an imperfect price correlation between the futures and the underlying securities. Second, it is possible that a lack of liquidity for futures contracts could exist in the secondary market, resulting in an inability to close a position prior to its maturity date. Third, the futures contract involves the risk that the Funds could lose more than the original margin deposit required to initiate a futures transaction.

Finally, the risk exists that losses could exceed amounts disclosed on the Statements of Assets and Liabilities.

It is the Funds' policy to present the gross variation margin payable and the gross variation margin receivable of the future contracts separately on the

July 31, 2020

Statements of Assets and Liabilities, as the Funds do not have a master netting agreement with the counterparty to the futures contracts. Refer to each Fund's Schedule of Investments for details regarding open future contracts as of July 31, 2020, if applicable. The fair value of interest rate futures contracts held in the Fixed Income Funds can be found on the Statements of Assets and Liabilities under the captions Receivable for Variation Margin and Payable for Variation Margin. Only current day's variation margin is reported within the Statements of Assets and Liabilities. Cumulative appreciation/ depreciation of futures contracts are reported in the respective Fixed Income Funds' Schedule of Investments. Realized gains or losses on interest rate futures contracts related to the Fixed Income Funds are recognized on the Statements of Operations as part of Net Realized Gain (Loss) on Futures Contracts and any change in unrealized appreciation or depreciation is recognized on the Statements of Operations as Net Unrealized Gain (Loss) on Futures Contracts.

**Swap Agreements** — To the extent consistent with its investment objective and strategies, a Fund's investment in swap contracts is mainly used as an efficient means to take and manage risk in the portfolio, including interest rate risk, credit risk and overall yield sensitivity. A swap agreement is a two-party contract under which an agreement is made to exchange returns from predetermined investments or instruments, including a particular interest rate, foreign currency, or "basket" of securities representing a particular index. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments) with respect to a notional amount of principal. Credit-default swaps involve periodic payments by a Fund or counterparty based on a specified rate multiplied by a notional amount assigned to an underlying debt instrument or group of debt instruments in exchange for the assumption of credit risk on the same instruments. In the event of a credit event, usually in the form of a credit rating downgrade, the party receiving periodic payments (i.e. floating rate payer) must pay the other party (i.e. fixed rate payer) an amount equal to the recovery rate used to settle the contracts. The recovery rate is a function of how many credit default swap investors wish to deliver the security or receive the security. The recovery rate is determined through an auction process. Total return swaps allow an investor to benefit from the cash flow without ever actually owning the underlying security. The receiver must pay any decline in value to the payer at the end of the total return swap. However, the investor does not need to make a payment if there is

no decline in price. Payments can be made on various indices, bonds (i.e. mortgage backed securities, bank debt and corporate), loans or commodities. The value of a total return swap is equal to the change in value of the underlying asset versus the accrued income payment based on LIBOR or some other form of indices on the notional amount. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments) with respect to a notional amount of principal to manage a Fund's exposure to interest rates. Payments received or made are recorded as realized gains or loss. A Fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the Counterparty defaults on its obligation to perform. Risk of loss may exceed amounts recognized on the statement of assets and liabilities. Interest rate swap contracts outstanding at period end, if any, are listed after a Fund's portfolio. In connection with swap agreements securities may be set aside as collateral by a Fund's custodian. A Fund may enter into swap agreements in order to, among other things, change the maturity or duration of the investment portfolio, to protect a Fund's value from changes in interest rates, or to expose a Fund to a different security or market.

Swaps are marked-to-market daily based upon quotations from market makers and the resulting changes in market values, if any, are recorded as an unrealized gain or loss in the Statement of Operations. Net payments of interest are recorded as realized gains or losses.

Entering into swap agreements involves, to varying degrees, elements of credit and market risk in excess of the amounts recognized on the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its obligation to perform and that there may be unfavorable changes in the fluctuation of interest rates. Risks also arise from potential losses from adverse market movements.

This risk is mitigated by having a master netting arrangement between a Fund and the counterparty and by having the counterparty post collateral to cover a Fund's exposure to the counterparty. There were no outstanding swap agreements as of July 31, 2020.

**Options Written/Purchased** — To the extent consistent with its Investment Objective and Strategies, a Fund may invest in financial options contracts to add return or to hedge their existing portfolio securities. When the Fund writes or purchases an option, an amount equal to the premium received or paid by the Fund is recorded

as a liability or an asset and is subsequently adjusted to the current market value of the option written or purchased. Premiums received or paid from purchasing or writing options which expire unexercised are treated by the Fund on the expiration date as realized gains or losses. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction, including brokerage commissions, is also treated as a realized gain or loss. If an option is exercised, the premium paid or received is added to the cost of the purchase or proceeds from the sale in determining whether the Fund has realized a gain or a loss. The risk in writing a call option is that the Fund gives up the opportunity for profit if the market price of the security increases. The risk in writing a put option is that the Fund may incur a loss if the market price of the security decreases and the option is exercised. The risk in purchasing an option is that the Fund pays a premium whether or not the option is exercised. The Fund also has the additional risk of being unable to enter into a closing transaction at an acceptable price if a liquid secondary market does not exist. Option contracts also involve the risk that they may not work as intended due to unanticipated developments in market conditions or other causes. Finally, the risk exists that losses could exceed amounts disclosed on the Statement of Assets and Liabilities. There were no outstanding options contracts as of July 31, 2020.

**TBA Purchase Commitments** — To the extent consistent with its Investment Objective and Strategies, a Fixed Income Fund may engage in “to be announced” (“TBA”) purchase commitments to purchase securities for a fixed price at a future date. TBA purchase commitments may be considered securities and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which risk is in addition to the risk of decline in the value of a Fund’s other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under “Security Valuation” above.

**Collateralized Debt Obligations** — To the extent consistent with its Investment Objective and Strategies, a Fund may invest in collateralized debt obligations (“CDOs”), which include collateralized loan obligations (“CLOs”) and other similarly structured securities. CLOs are a type of asset-backed securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. CDOs may charge management fees and administrative expenses.

For CDOs and CLOs, the cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the “equity” tranche which bears the bulk of defaults from the bonds or loans in the trust and serves to protect the other, more senior tranches from default in all but the most severe circumstances. Since it is partially protected from defaults, a senior tranche from a CDO and CLO trust typically has a higher rating and lower yield than its underlying securities, and can be rated investment grade. Despite the protection from the equity tranche, CDO and CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as aversion to CDO and CLO securities as a class.

The risks of an investment in a CDO and CLO depend largely on its class and its collateral securities. Normally, CLOs and other CDOs are privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in CDOs and CLOs may be characterized by the Funds as illiquid securities; however, an active dealer market may exist for CDOs and CLOs, allowing a CDO and CLO to qualify for Rule 144A transactions. In addition to the normal risks associated with fixed income securities (e.g., interest rate risk and default risk), CDOs and CLOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Funds may invest in CDOs and CLOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

**Illiquid Securities** — A security is considered illiquid if it cannot be sold or disposed of in the ordinary course of business within seven days or less for its approximate carrying value on the books of a Fund. Valuations of illiquid securities may differ significantly from the values that would have been used had an active market value for these securities existed.

**Restricted Securities** — Throughout the year, the Funds owned private placement investments that were purchased through private offerings or acquired through initial public offerings that could not be sold without prior registration under the Securities Act of 1933 or pursuant to an exemption there from. In addition, the Funds had generally agreed to further restrictions on the disposition of certain holdings as set forth in various agreements entered into in connection with the purchase of those investments. These investments

## NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

July 31, 2020

were valued at amortized cost, which approximates fair value, as determined in accordance with the procedures approved by the Board of Trustees. At July 31, 2020, the Funds did not own any restricted securities except for those designated as 144A on the schedules of investments.

**Classes** — Class-specific expenses are borne by that class of shares. Income, non-class specific expenses, and realized and unrealized gains/losses are allocated to the respective class on the basis of relative daily net assets.

**Expenses** — Expenses that are directly related to one of the Funds are charged directly to that Fund. Other operating expenses of the Funds are prorated to the Funds on the basis of relative net assets.

**Dividends and Distributions to Shareholders** — Dividends from net investment income are declared daily and paid monthly. Any net realized capital gains on sales of securities after capital loss carryover are distributed at least annually by the Funds.

### 3. INVESTMENT ADVISORY, ADMINISTRATION, DISTRIBUTION AND CUSTODIAN AGREEMENTS AND OTHER TRANSACTIONS WITH AFFILIATES

**Investment Advisory, Administration, Distribution and Custodian Agreements** — SEI Investments Management Corporation (“SIMC”) serves as each Fund’s investment adviser (the “Adviser”) and “manager of managers” under an investment advisory agreement approved by the shareholders of each Fund. In connection with serving as Adviser, SIMC is entitled to a fee, which is calculated daily and paid monthly, based on the average daily net assets of each Fund. SEI Investments Global Funds Services (the “Administrator”) provides the Trust with administrative and transfer agency services. For its services, the Administrator is entitled to a fee, which is calculated daily and paid monthly, based on the average daily net assets of each Fund.

SEI Investments Distribution Co. (the “Distributor”), a wholly owned subsidiary of SEI Investments Company (“SEI”) and a registered broker-dealer, acts as the Distributor of the shares of the Trust under a Distribution Agreement. The Trust also has adopted plans under which firms, including the Distributor, that provide shareholder services may receive compensation thereof.

Such plans provide fees payable to the Distributor up to the amounts, calculated as a percentage of the average daily net assets attributable to each particular class of each respective fund.

The Money Market Funds’ Administrator and/or the Distributor have contractually agreed to waive fees or reimburse expenses for each Money Market Fund

until May 31, 2021, in order to keep total fund operating expenses (exclusive of interest from borrowings, brokerage commissions, trustees’ fees, taxes and other extraordinary expenses not incurred in the ordinary course of the Fund’s business) from exceeding the levels specified in the table below. These contractual waivers and reimbursements will only apply if a Money Market Fund’s total operating costs exceed the applicable thresholds and will not affect the Money Market Fund’s total operating costs if they are less than the applicable thresholds. In other words, shareholders will pay the lower of a Money Market Fund’s actual total fund operating expenses or total fund operating expenses after contractual waivers and expense reimbursements. The contractual waiver and expense reimbursement are limited to the Money Market Fund’s direct operating expenses and, therefore, do not apply to indirect expenses incurred by a fund, such as acquired fund fees and expenses (“AFFE”). The agreement may be amended or terminated only with the consent of the Board of Trustees.

The Adviser, Administrator and/or Distributor have voluntarily agreed to waive a portion of their fees in order to keep total direct operating expenses (exclusive of interest from borrowings, brokerage commissions, taxes, Trustee fees, prime broker fees, interest and dividend expenses related to short sales and extraordinary expenses not incurred in the ordinary course of the Funds’ business) at a specified level.

The waivers by the Fixed Income Funds’ Adviser, Administrator and/or Distributor are limited to the Fixed Income Funds’ direct operating expenses and, therefore, do not apply to indirect expenses incurred by the Funds, such as acquired fund fees and expenses. The waivers are voluntary and the Fixed Income Funds’ Adviser, Administrator and/or Distributor may discontinue all or part of any of these waivers at any time. In addition, some Funds may participate in a commission recapture program where the Funds’ trades may be executed through the Funds’ distributor, and a portion of the commissions paid on those trades are then used to pay the Funds’ expenses.

The following is a summary of annual fees payable to the Adviser, and Distributor and the expense limitations for each fund:

	Advisory Fees	Shareholder Servicing Fees	Expense Limitations
Government Fund			
Class F	0.07%	0.25%	0.20% <sup>(3)</sup>
Class CAA	0.07%	0.25%	0.20% <sup>(3)</sup>
Government II Fund			
Class F	0.07%	0.25%	0.20% <sup>(2)</sup>
Treasury II Fund			
Class F	0.07%	0.25%	0.20% <sup>(2)</sup>
Ultra Short Duration Bond Fund			
Class F	0.10% <sup>(4)</sup>	0.25%	0.38% <sup>(1)</sup>
Class Y	0.10% <sup>(4)</sup>	—%	0.30% <sup>(1)</sup>
Short-Duration Government Fund			
Class F	0.09% <sup>(5)</sup>	0.25%	0.48% <sup>(1)</sup>
Class Y	0.09% <sup>(5)</sup>	—%	0.38% <sup>(1)</sup>
GNMA Fund			
Class F	0.09% <sup>(5)</sup>	0.25%	0.63% <sup>(1)</sup>
Class Y	0.09% <sup>(5)</sup>	—%	0.43% <sup>(1)</sup>

(1) Represents a voluntary cap that may be discontinued at any time.

(2) Represents a contractual cap effective through May 31, 2021, to be changed only by board approval.

(3) Represents a contractual cap of .25%, effective through May 31, 2021, to be changed only by Board approval. In addition, management has voluntarily waived fees to a cap of .20% that may be discontinued at any time.

(4) The Adviser receives an annual fee equal to .10% on the first \$500 million of net assets, .075% of net assets between \$500 million and \$1 billion and .05% on the net assets in excess of \$1 billion for the Ultra Short Duration Bond Fund. The fee is calculated based on the net assets of the Ultra Short Duration Bond Fund.

(5) The Adviser receives an annual fee equal to .10% on the first \$500 million of net assets, .075% of net assets between \$500 million and \$1 billion and .05% on the net assets in excess of \$1 billion for the Short-Duration Government and GNMA Funds. The fee is a blended percentage and is calculated based on the combined assets of these Funds.

The following is a summary of annual fees payable to the Administrator:

	Administration Fees				
	First \$1.5 Billion of Assets	Next \$500 Million of Assets	Next \$500 Million of Assets	Next \$500 Million of Assets	Over \$3 Billion of Assets
Government Fund	0.150%	0.1375%	0.1250%	0.1125%	0.100%
Government II Fund	0.150%	0.1375%	0.1250%	0.1125%	0.100%
Treasury II Fund	0.150%	0.1375%	0.1250%	0.1125%	0.100%
Ultra Short Duration Bond Fund	0.200%	0.1775%	0.1550%	0.1325%	0.110%
Short-Duration Government Fund	0.200%	0.1775%	0.1550%	0.1325%	0.110%
GNMA Fund	0.200%	0.1775%	0.1550%	0.1325%	0.110%

The Distributor has voluntarily waived all or a portion of the shareholder servicing fees for Class F of each fund, except for the GNMA Fund, since inception of the plan. Such waivers are voluntary and may be discontinued at any time.

The Administrator and Distributor have voluntarily agreed to waive and reduce their fee and/or reimburse certain expenses of the Money Market Funds in order to limit the one-day net income yield of the Funds to not less than 0.01% of the Funds' average daily net assets. The Funds did not have any such waivers by class for the period ended July 31, 2020.

Pursuant to the “manager of managers” structure, the Board of Trustees approved BlackRock Advisors, LLC as sub-adviser to the Money Market Funds, MetLife Investment Management, LLC. serves as a sub-adviser

to the Ultra Short Duration Bond Fund and Wellington Management Company, LLP (“Wellington LLP”) serves as sub-adviser to the Fixed Income Funds. Each sub-adviser is party to an investment sub-advisory agreement with the Advisor. For its services to the Funds, the sub-advisers are entitled to receive a fee paid directly by the Adviser.

U.S. Bank, N.A. serves as the custodian of the Funds. The custodian plays no role in determining the investment policies of the Funds or which securities are to be purchased or sold in the Funds.

**Other** — Certain officers and Trustees of the Trust are also officers and/or Trustees of the Administrator, Adviser, or the Distributor. The Trust pays each unaffiliated Trustee an annual fee for attendance at quarterly, interim, and committee meetings. The

## NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

July 31, 2020

Administrator, Adviser and/or the Distributor pays compensation of Officers and affiliated Trustees.

A portion of the services provided by the Chief Compliance Officer (“CCO”) and his staff, whom are employees of the administrator, are paid for by the Trust as incurred. The services include regulatory oversight of the Trust’s Adviser, Sub-Advisers and service providers as required by SEC regulations.

**Interfund Lending** — The SEC has granted an exemption that permits the Trust to participate in an inter-fund lending program (the “Program”) with existing or future investment companies registered under the 1940 Act that are advised by SIMC (the “SEI Funds”). The Program allows the SEI Funds to lend money to and borrow money from each other for temporary or emergency purposes. Participation in the Program is voluntary for both borrowing and lending funds. Inter-fund loans may be made only when the rate of interest to be charged is more favorable to the lending fund than an investment in overnight repurchase agreements (“Repo Rate”), and more favorable to the borrowing fund than the rate of interest that would be charged by a bank for short-term borrowings (“Bank Loan Rate”). The Bank Loan Rate will be determined using a formula reviewed annually by the SEI Funds Board of Trustees. The interest rate imposed on inter-fund loans is the average of the Repo Rate and the Bank Loan Rate. For the period ended July 31, 2020, the Trust has not participated in the Program.

### 4. INVESTMENT TRANSACTIONS

The cost of security purchases and the proceeds from the sale of securities, other than short-term investments, for the period ended July 31, 2020, were as follows for the Fixed Income Funds:

	U.S. Gov't (\$ Thousands)	Other (\$ Thousands)	Total (\$ Thousands)
<b>Ultra Short Duration Bond Fund</b>			
Purchases	\$ 14,301	\$ 51,576	\$ 65,877
Sales	30,994	58,228	89,222
<b>Short-Duration Government Fund</b>			
Purchases	1,306,518	—	1,306,518
Sales	1,331,057	—	1,331,057
<b>GNMA Fund</b>			
Purchases	169,966	2,201	172,167
Sales	142,463	92	142,555

### 5. FEDERAL TAX INFORMATION

It is each Fund’s intention to continue to qualify as a regulated investment company for Federal income tax purposes and distribute all of its taxable income (including net capital gains). Accordingly, no provision for Federal income taxes is required.

**Reclassification of Components of Net Assets** — The timing and characterization of certain income and capital gain distributions are determined annually in accordance with Federal tax regulations which may differ from accounting principles generally accepted in the United States. As a result, net investment income (loss) and net realized gain (loss) on investment transactions for the reporting period may differ from distributions during such period. These book/tax differences may be temporary or permanent in nature.

To the extent these differences are permanent, they are charged or credited to paid-in capital or distributable earnings (accumulated losses), as appropriate, in the periods that the differences arise. Permanent differences are primarily attributable to paydowns, and reclass of TIPS. None of these permanent differences necessitate a charge to the paid in capital account.

The tax character of dividends and distributions during the last two fiscal years was as follows:

		Ordinary Income (\$ Thousands)	Total (\$ Thousands)
Government Fund	2020	\$ 147,556	\$ 147,556
	2019	130,309	130,309
Government II Fund	2020	39,078	39,078
	2019	31,343	31,343
Treasury II Fund	2020	9,909	9,909
	2019	9,596	9,596
Ultra Short Duration Bond Fund	2020	7,697	7,697
	2019	6,803	6,803
Short-Duration Government Fund	2020	13,648	13,648
	2019	13,839	13,839
GNMA Fund	2020	1,739	1,739
	2019	1,927	1,927

As of January 31, 2020, the components of Distributable Earnings/(Accumulated Losses) on a tax basis were as follows:

	Undistributed Ordinary Income (\$ Thousands)	Undistributed Long-Term Capital Gain (\$ Thousands)	Capital Loss Carryforwards (\$ Thousands)	Post- October Losses (\$ Thousands)	Late Year Ordinary Losses (\$ Thousands)	Unrealized Appreciation (Depreciation) (\$ Thousands)	Other Temporary Differences (\$ Thousands)	Total Distributable Earnings (Accumulated Losses) (\$ Thousands)
Government Fund	\$ 8,268	\$ —	\$ —	\$ —	\$ —	\$ —	(8,191)	77
Government II Fund	2,513	—	—	—	—	—	(2,437)	76
Treasury II Fund	530	—	—	—	—	—	(504)	26
Ultra Short Duration Bond Fund	84	—	(6,157)	—	—	1,239	(143)	(4,977)
Short-Duration Government Fund	861	—	(17,188)	—	—	6,140	(1,428)	(11,615)
GNMA Fund	130	—	(3,046)	—	—	1,458	(131)	(1,589)

The other temporary differences in the current year are primarily attributable to Treasury straddle loss deferral.

For Federal income tax purposes, capital loss carryforwards may be carried forward and applied against future capital gains. It is the Funds' intent that they will not distribute any realized gain distributions until the carryforwards have been offset or expired.

During the fiscal year ended January 31, 2020, the Government II Fund, Treasury II Fund, Short-Duration Government Fund and GNMA Fund utilized \$29,185, \$5,999, \$1,301,266 and \$207,455, respectively, of capital loss carryforwards to offset capital gains.

At January 31, 2020, the following Funds had capital loss carryforwards to offset future realized capital gains:

	Short-Term Loss (\$ Thousands)	Long-Term Loss (\$ Thousands)	Total *
<b>Ultra Short Duration Bond Fund</b>	\$ 89	\$ 6,068	\$ 6,157
<b>Short-Duration Government Fund</b>	2,759	14,429	17,188
<b>GNMA Fund</b>	2,314	732	3,046

Post October losses represent losses realized on investment transactions from November 1, 2019 through December 31, 2019, that, in accordance with Federal income tax regulations, the Funds may defer and treat as having arisen in the following fiscal year.

**NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)**

July 31, 2020

During the period ended July 31, 2020, the Money Market Funds' cost of securities for Federal income tax purposes approximates the cost located in the Statements of Assets and Liabilities.

For Federal income tax purposes, the cost of securities owned at July 31, 2020, and net realized gains or losses on securities sold for the year, were different from amounts reported for financial reporting purposes, primarily due to wash sales which cannot be used for Federal income tax purposes in the current year and have been deferred for use in future years. The Federal tax cost and aggregate gross unrealized appreciation and depreciation on investments (including foreign currency and derivatives, if applicable) held by the Fixed Income Funds at July 31, 2020, were as follows:

	Federal Tax Cost (\$ Thousands)	Appreciated Securities (\$ Thousands)	Depreciated Securities (\$ Thousands)	Net Unrealized Appreciation (Depreciation) (\$ Thousands)
Ultra Short Duration Bond Fund	\$ 312,391	\$ 2,265	\$ (795)	\$ 1,470
Short-Duration Government Fund	858,032	12,642	(2,017)	10,625
GNMA Fund	98,324	2,598	(310)	2,288

Management has analyzed the Funds' tax positions taken on the federal tax returns for all open tax years and has concluded that as of July 31, 2020, no provision for income tax is required in the Funds' financial statements. The Funds' federal income and excise tax returns are subject to examination by the IRS for all open tax years under the applicable Statute of Limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

**6. CONCENTRATION/RISKS**

In the normal course of business, a Fund may enter into contracts that provide general indemnifications by a Fund to the counterparty to the contract. A Fund's maximum exposure under these arrangements is dependent on future claims that may be made against a Fund and, therefore, cannot be established; however, based on experience, management believes the risk of loss from such claim is considered remote.

The following is not intended to be a complete discussion of the risks associated with investing in a fund. Please review each Fund's prospectus for additional disclosures regarding principal risks associated with investing in a fund.

**Asset-Backed Securities Risk** — The Ultra Short Duration Bond Fund is subject to asset-backed securities risk, whereas payment of principal and interest on asset-backed securities is dependent largely on the cash flows generated by the assets backing the securities.

Securitization trusts generally do not have any assets or sources of funds other than the receivables and related property they own, and asset-backed securities are generally not insured or guaranteed by the related sponsor or any other entity. Asset-backed securities may be more illiquid than more conventional types of fixed income securities that the Fund may acquire.

**Commercial Paper Risk** — The Ultra Short Duration Bond Fund is subject to commercial paper risk. Commercial paper is a short-term obligation with a maturity generally ranging from one to 270 days and is issued by U.S. or foreign companies or other entities in order to finance their current operations. Such investments are unsecured and usually discounted from their value at maturity. The value of commercial paper may be affected by changes in the credit rating or financial condition of the issuing entities and will tend to fall when interest rates rise and rise when interest rates fall. Asset-backed commercial paper may be issued by structured investment vehicles or other conduits that are organized to issue the commercial paper and to purchase trade receivables or other financial assets. The repayment of asset-backed commercial paper depends primarily on the cash collections received from such an issuer's underlying asset portfolio and the issuer's ability to issue new asset-backed commercial paper.

**Corporate Fixed Income Risk** — The Ultra Short Duration Bond Fund is subject to corporate fixed income risk. Corporate fixed income securities respond to economic developments, especially changes in interest rates, as well as to perceptions of the creditworthiness and business prospects of individual issuers.

**Credit Risk** — The Funds are all subject to the risk that the issuer of a security or the counterparty to a contract will default or otherwise become unable to honor a financial obligation.

**Derivatives Risk** — The Fixed Income Funds' use of futures contracts and forward contracts is subject to market risk, leverage risk, correlation risk and liquidity risk. Leverage risk, liquidity risk and market risk are described below. Many over-the-counter ("OTC") derivative instruments will not have liquidity beyond the counterparty to the instrument. Correlation risk is the risk that changes in the value of the derivative instrument may not correlate perfectly with the underlying asset, rate or index. The Fund's use of forward contracts is also subject to credit risk and valuation risk. Valuation risk is the risk that the derivative may be difficult to value and/or valued incorrectly. Credit risk is described above. Each of these risks could cause the Fund to lose more than the principal amount invested in a derivative instrument. Some derivatives have the potential for unlimited loss, regardless of the size of the

Fund's initial investment. The other parties to certain derivative contracts present the same types of credit risk as issuers of fixed income securities. The Fixed Income Funds' use of derivatives may also increase the amount of taxes payable by shareholders. Both U.S. and non-U.S. regulators are in the process of adopting and implementing regulations governing derivatives markets, the ultimate impact of which remains unclear.

**Duration Risk** — The longer-term securities in which the Fixed Income Funds may invest tend to be more volatile than shorter-term securities. A portfolio with a longer average portfolio duration is more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

**Economic Risks of Global Health Events** — Global health events and pandemics, such as COVID-19, have the ability to affect—quickly, drastically and substantially the economies of many nations, states, individual companies and the markets in general and can cause disruptions that cannot necessarily be foreseen. The spread of COVID-19 around the world in 2020 resulted in a substantial number of nations implementing social distancing measures, quarantines, and the shutdown of non-essential businesses and governmental services. Further, it has caused significant volatility in U.S. and international markets. The impact of the outbreak may be short term or may last for an extended period of time.

**Extension Risk** — The Funds are subject to the risk that rising interest rates may extend the duration of a fixed income security, typically reducing the security's value.

**Market Risk** — The prices of the Funds' fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments and their agencies. Generally, the Funds' fixed income securities will decrease in value if interest rates rise and vice versa. In a low interest rate environment, risks associated with rising rates are heightened. Declines in dealer market-making capacity as a result of structural or regulatory changes could decrease liquidity and/or increase volatility in the fixed income markets. In the case of foreign securities, price fluctuations will reflect international economic and political events, as well as changes in currency valuations relative to the U.S. dollar. In response to these events, the Funds' value may fluctuate and/or the Funds may experience increased redemptions from shareholders, which may impact the Funds' liquidity or force the Funds to sell securities into a declining or illiquid market. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies

of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Funds invest, which in turn could negatively impact the Funds' performance and cause losses on your investment in the Funds.

**Foreign Issuer Risk** — The Ultra Short Duration Bond Fund is subject to the risk that issuers in foreign countries face political and economic events unique to such countries. These events will not necessarily affect the U.S. economy or similar issuers located in the U.S.

**Interest Rate Risk** — The Money Market Funds' are subject to the risk that the Fund's yield will decline due to falling interest rates. A rise in interest rates typically causes a fall in the value of fixed income securities in which the Fund invests, while a fall in interest rates typically causes a rise in the value of such securities. During periods when interest rates are low, the Fund's yield will also be low, and the income generated by the Fund may not be sufficient to offset all or a significant portion of the Fund's expenses, which could impair the Fund's ability to provide a positive yield and maintain a stable \$1.00 share price.

The Fixed Income Funds' are subject to the risk that a rise in interest rates will cause a fall in the value of fixed income securities, including U.S. Government securities, in which the Funds invest. A low interest rate environment may present greater interest rate risk, because there may be a greater likelihood of rates increasing and rates may increase more rapidly.

**Investment Style Risk** — The Fixed Income Funds are subject to the risk that a Funds' investments in certain securities in a particular market segment pursuant to its particular investment strategy may underperform other market segments or the market as a whole.

**Leverage Risk** — The Fixed Income Funds' use of derivatives or investments in repurchase agreements may result in the Funds' total investment exposure substantially exceeding the value of its portfolio securities and the Funds' investment returns depending substantially on the performance of securities that the Funds may not directly own. The use of leverage can amplify the effects of market volatility on the Funds' share price and may also cause the Funds to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The Funds' use of leverage may result in a heightened risk of investment loss.

**Liquidity Risk** — The Funds are subject to the risk that certain securities may be difficult or impossible to sell

## NOTES TO FINANCIAL STATEMENTS (Unaudited) (Concluded)

July 31, 2020

at the time and the price that the seller would like. The seller may have to lower the price of the security, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on Fund management or performance.

**Mortgage-Backed Securities Risk** — The Fixed Income Funds are subject to mortgage-backed securities risk. Mortgage-backed securities are affected significantly by the rate of prepayments and modifications of the mortgage loans backing those securities, as well as by other factors such as borrower defaults, delinquencies, realized or liquidation losses and other shortfalls. Mortgage-backed securities are particularly sensitive to prepayment risk, which is described below, given that the term to maturity for mortgage loans is generally substantially longer than the expected lives of those securities; however, the timing and amount of prepayments cannot be accurately predicted. The timing of changes in the rate of prepayments of the mortgage loans may significantly affect the Fund's actual yield to maturity on any mortgage-backed securities, even if the average rate of principal payments is consistent with the Funds' expectations. Along with prepayment risk, mortgage-backed securities are significantly affected by interest rate risk, which is described above. In a low interest rate environment, mortgage loan prepayments would generally be expected to increase due to factors such as refinancings and loan modifications at lower interest rates. In contrast, if prevailing interest rates rise, prepayments of mortgage loans would generally be expected to decline and therefore extend the weighted average lives of mortgage-backed securities held or acquired by a fund.

**Opportunity Risk** — The Funds are subject to the risk of missing out on an investment opportunity because the assets necessary to take advantage of it are tied up in other investments.

**Prepayment Risk** — The Fixed Income Funds are subject to the risk that, in a declining interest rate environment, fixed income securities with stated interest rates may have the principal paid earlier than expected, requiring the Funds to invest the proceeds at generally lower interest rates.

**Portfolio Turnover Risk** — Due to their investment strategies, the Short-Duration Government Fund and GNMA Fund may buy and sell securities frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect the Funds' performance.

**Redemption Risk** — The Money Market Funds may experience periods of heavy redemptions that could cause the Funds to liquidate its assets at inopportune

times or at a loss or depressed value, particularly during periods of declining or illiquid markets. This could have a significant adverse effect on the Funds' ability to maintain a stable \$1.00 share price, and, in extreme circumstances, could cause the Funds to suspend redemptions and liquidate completely.

**Repurchase Agreement Risk** — The Funds are subject to repurchase agreement risk. Although repurchase agreement transactions must be fully collateralized at all times, they generally create leverage and involve some counterparty risk to the Fund whereby a defaulting counterparty could delay or prevent the Funds' recovery of collateral.

**U.S. Government Securities Risk** — The Funds are subject to U.S. Government securities risk. Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency's own resources. No assurance can be given that the U.S. Government will provide financial support to its agencies and instrumentalities if it is not obligated by law to do so.

## 7. CONCENTRATION OF SHAREHOLDERS

SEI Private Trust Company ("SPTC") and SIMC are subsidiaries of SEI Investments Company. As of July 31, 2020, SPTC held of record the following:

Government Fund, CI CAA	100.00%
Government Fund, CI F	72.74 %
Government II Fund	54.21 %
Treasury II Fund	98.47 %
Ultra Short Duration Bond Fund, CI F	93.45 %
Ultra Short Duration Bond Fund, CI Y	85.88 %
Short-Duration Government Fund, CI F	97.45 %
Short-Duration Government Fund, CI Y	30.36 %
GNMA Fund, CI F	87.12 %
GNMA Fund, CI Y	98.78 %

SPTC is not a direct service provider to the Funds. However, SPTC performs a key role in the comprehensive investment solution that SEI provides to investors. SPTC holds the vast majority of shares in the Funds as custodian for shareholders that are clients of the advisors and financial planners. SPTC maintains accounts at SEI Institutional Transfer Agency ("SITA"), and operates in an omnibus fund account environment.

## 8. REGULATORY MATTERS

In July 2017, the Financial Conduct Authority, the United Kingdom's financial regulatory body, announced that after 2021 it will cease its active encouragement of banks to provide the quotations needed to sustain

LIBOR. That announcement suggests that LIBOR very likely will cease to be published after that time. Various financial industry groups have begun planning for that transition, whether through marketwide protocols, fallback contractual provisions, bespoke negotiations or amendments or otherwise, but there are obstacles to converting certain securities and transactions to a new benchmark. Transition planning is at an early stage, and neither the effect of the transition process nor its ultimate success can yet be known. The transition process might lead to increased volatility and illiquidity in markets for instruments whose terms currently include LIBOR. It could also lead to a reduction in the value of some LIBOR-based investments and reduce the effectiveness of new hedges placed against existing LIBOR-based investments. While some LIBOR-based instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative rate setting methodology and/or increased costs for certain LIBOR-related instruments or financing transactions, not all may have such provisions and there may be significant uncertainty regarding the effectiveness of any such alternative methodologies, resulting in prolonged adverse market conditions for a fund. Because the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the end of 2021. There also remains uncertainty and risk regarding the willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments. All of the aforementioned may adversely affect a fund's performance or NAV.

## 9. NEW ACCOUNTING PRONOUNCEMENT

In August 2018, The FASB issued Accounting Standards Update 2018-13, Fair Value Measurement (Topic 820). The new guidance includes additions and modifications to disclosures requirements for fair value measurements. For public entities, the amendments are effective for financial statements issued for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Management elected to early adopt the removal and modifications of certain disclosures and delay the adoption of additional disclosures until the effective date.

## 10. SUBSEQUENT EVENTS

Management has evaluated the need for disclosures and/or adjustments resulting from subsequent events through the date the financial statements were issued. Based on this evaluation, no disclosures and/or adjustments were required to the financial statements as of July 31, 2020.

**DISCLOSURE OF FUND EXPENSES (Unaudited)**

July 31, 2020

All mutual funds have operating expenses. As a shareholder of a mutual fund, your investment is affected by these ongoing costs, which include (among others) costs for portfolio management, administrative services, and shareholder reports like this one. It is important for you to understand the impact of these costs on your investment returns.

Operating expenses such as these are deducted from the mutual fund's gross income and directly reduce your final investment return. These expenses are expressed as a percentage of the mutual fund's average net assets; this percentage is known as the mutual fund's expense ratio.

The following examples use the expense ratio and are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (February 1, 2020 to July 31, 2020).

The table on the next page illustrates your Fund's costs in two ways:

- **Actual Fund Return.** This section helps you to estimate the actual expenses after fee waivers that your Fund incurred over the period. The "Expenses Paid During Period" column shows the actual dollar expense cost incurred by a \$1,000 investment in the Fund, and the "Ending Account Value" number is derived from deducting that expense cost from the Fund's gross investment return.

You can use this information, together with the actual amount you invested in your Fund, to estimate the expenses you paid over that period. Simply divide your actual starting account value by \$1,000 to arrive at a ratio (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply that ratio by the number shown for your Fund under "Expenses Paid During Period."

- **Hypothetical 5% Return.** This section helps you compare your Fund's costs with those of other mutual funds. It assumes that your Fund had an annual 5% return before expenses during the year, but that the expense ratio (Column 3) is unchanged. This example is useful in making comparisons because the Securities and Exchange Commission requires all mutual funds to make this 5% calculation. You can assess your Fund's comparative cost by comparing the hypothetical result for your Fund in the "Expenses Paid During Period" column with those that appear in the same charts in the shareholder reports for other mutual funds.

**NOTE:** Because the return is set at 5% for comparison purposes — NOT your Fund's actual return — the account values shown do not apply to your specific investment.

	Beginning Account Value 2/1/20	Ending Account Value 7/31/20	Annualized Expense Ratios	Expenses Paid During Period *
<b>Government Fund</b>				
<b>Actual Fund Return</b>				
Class F	\$1,000.00	\$1,002.20	0.20%	\$1.00

Class Y	1,000.00	1,023.27	0.32	1.61

\* Expenses are equal to the Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 182/366.

## **LIQUIDITY RISK MANAGEMENT PROGRAM (Unaudited)**

Pursuant to Rule 22e-4 under the 1940 Act, the Trust, on behalf of the Funds, has adopted a liquidity risk management program (the “Program”) to govern the Trust’s approach to managing liquidity risk. The Program is overseen by the SIMC Liquidity Risk Oversight Committee, and the Program’s principal objectives include assessing, managing and periodically reviewing each Fund’s liquidity risk, based on factors specific to the circumstances of the Fund.

At a meeting of the Board held on March 24, 2020, the Trustees received a report from the SIMC Liquidity Risk Oversight Committee addressing the operations of the Program and assessing its adequacy and effectiveness of implementation. The SIMC Liquidity Risk Oversight Committee determined, and reported to the Board, that the Program is reasonably designed to assess and manage each Fund’s liquidity risk and has operated adequately and effectively to manage each Fund’s liquidity risk since the Program was implemented on December 1, 2018. The SIMC Liquidity Risk Oversight Committee reported that during the period covered by the report, there were no liquidity events that impacted the Funds or their ability to timely meet redemptions without dilution to existing shareholders. The SIMC Liquidity Risk Oversight Committee further noted that no material changes have been made to the Program since its implementation.

There can be no assurance that the Program will achieve its objectives in the future. Please refer to the prospectus for more information regarding a Fund’s exposure to liquidity risk and other principal risks to which an investment in the Funds may be subject.

## BOARD OF TRUSTEES' CONSIDERATIONS IN APPROVING THE ADVISORY AGREEMENT (Unaudited)

SEI Daily Income Trust (the "Trust") and SEI Investments Management Corporation ("SIMC") have entered into an investment advisory agreement (the "Advisory Agreement"), pursuant to which SIMC provides investment advisory services to the series of the Trust (the "Funds"). Pursuant to separate sub-advisory agreements with SIMC (the "Sub-Advisory Agreements" and, together with the Advisory Agreement, the "Investment Advisory Agreements"), and under the supervision of SIMC and the Trust's Board of Trustees (the "Board"), the sub-advisers (each, a "Sub-Adviser" and collectively, the "Sub-Advisers") provide security selection and certain other advisory services with respect to all or a discrete portion of the assets of the Funds. The Sub-Advisers are also responsible for managing their employees who provide services to the Funds. The Sub-Advisers are selected based primarily upon the research and recommendations of SIMC, which evaluates quantitatively and qualitatively the Sub-Advisers' skills and investment results in managing assets for specific asset classes, investment styles and strategies.

The Investment Company Act of 1940, as amended (the "1940 Act"), requires that the initial approval of a Fund's Investment Advisory Agreements be specifically approved by the vote of a majority of the outstanding shareholders of the Funds and the vote of a majority of the Trustees who are not parties to the Investment Advisory Agreements or "interested persons" of any party (the "Independent Trustees") cast in person at a meeting called for such purpose. In addition, the 1940 Act requires that the continuation or renewal of any Investment Advisory Agreement be approved at least annually (after an initial period of up to two years), which also requires the vote of a majority of the Board, including a majority of the Independent Trustees. In connection with their consideration of such renewals, the Funds' Trustees must request and evaluate, and SIMC and the Sub-Advisers are required to furnish, such information as may be reasonably necessary to evaluate the terms of the Investment Advisory Agreements. In addition, the Securities and Exchange Commission takes the position that, as part of their fiduciary duties with respect to a mutual fund's fees, mutual fund boards are required to evaluate the material factors applicable to a decision to approve an investment advisory agreement.

Consistent with these responsibilities, the Board calls and holds meetings each year to consider whether to approve new and/or renew existing Investment Advisory Agreements between the Trust and SIMC and SIMC and the Sub-Advisers with respect to the Funds of the Trust. In preparation for these meetings, the Board requests and reviews a wide variety of materials provided by SIMC and the Sub-Advisers, including information about SIMC's and the Sub-Advisers' affiliates, personnel and operations and the services provided pursuant to the Investment Advisory Agreements. The Board also receives data from third parties. This information is provided in addition to the detailed information about the Funds that the Board reviews during the course of each year, including information that relates to Fund operations and Fund performance. The Trustees also receive a memorandum from counsel regarding the responsibilities of Trustees in connection with their consideration of whether to approve the Trust's Investment Advisory Agreements. Finally, the Independent Trustees receive advice from independent counsel to the Independent Trustees, meet in executive sessions outside the presence of Fund management and participate in question and answer sessions with representatives of SIMC and the Sub-Advisers.

Specifically, during the first half of the Trust's fiscal year, the Board requested and received written materials from SIMC and the Sub-Advisers regarding: (i) the quality of SIMC's and the Sub-Advisers' investment management and other services; (ii) SIMC's and the Sub-Advisers' investment management personnel; (iii) SIMC's and the Sub-Advisers' operations and financial condition; (iv) SIMC's and the Sub-Advisers' brokerage practices (including any soft dollar arrangements) and investment strategies; (v) the level of the advisory fees that SIMC charges the Funds and the level of the sub-advisory fees that SIMC pays the Sub-Advisers, compared with fees each charge to comparable accounts; (vi) the advisory fees charged by SIMC and the Funds' overall fees and operating expenses compared with peer groups of mutual funds prepared by Broadridge, an independent provider of investment company data; (vii) the level of SIMC's and the Sub-Advisers' profitability from their Fund-related operations; (viii) SIMC's and the Sub-Advisers' compliance program, including a description of material compliance matters and material compliance violations; (ix) SIMC's potential economies of scale; (x) SIMC's and the Sub-Advisers' policies on and compliance procedures for personal securities transactions; (xi) SIMC's and the Sub-Advisers' expertise and resources in domestic and/or international financial markets; and (xii) the Funds' performance over various periods of time compared with peer groups of mutual funds prepared by Broadridge and the Funds' benchmark indexes.

At the March 23-25, 2020 meeting of the Board, the Trustees, including a majority of the Independent Trustees, approved the renewal of the Advisory Agreement. Also, certain Sub-Advisory Agreements were renewed at a meeting of the Board held during the course of the Trust's fiscal year on March 23-25, 2020. In each case, the Board's decision was based on its consideration and evaluation of the factors described above, as discussed at the

meeting and at prior meetings. The following discusses some, but not all, of the factors that were considered by the Board in connection with its assessment of the Investment Advisory Agreements.

**Nature, Extent and Quality of Services.** The Board considered the nature, extent and quality of the services provided by SIMC and the Sub-Advisers to the Funds and the resources of SIMC and the Sub-Advisers and their affiliates dedicated to the Funds. In this regard, the Trustees evaluated, among other things, SIMC's and each Sub-Adviser's personnel, experience, track record and compliance program. Following evaluation, the Board concluded that, within the context of its full deliberations, the nature, extent and quality of services provided by SIMC and the Sub-Advisers to the Funds and the resources of SIMC and the Sub-Advisers and their affiliates dedicated to the Funds were sufficient to support the renewal of the Investment Advisory Agreements. In addition to advisory services, the Board considered the nature and quality of certain administrative, transfer agency and other non-investment advisory services provided to the Funds by SIMC and/or its affiliates.

**Performance.** In determining whether to renew SIMC's Advisory Agreement, the Trustees considered the Funds' performance relative to their peer groups and appropriate indexes/benchmarks. The Trustees reviewed performance information for each Fund, noting that they receive performance reports that permit them to monitor each Fund's performance at board meetings throughout the year. As part of this review, the Trustees considered the composition of each peer group and selection criteria. In assessing Fund performance, the Trustees considered a report compiled by Broadridge, an independent third-party that was engaged to prepare an assessment of the Funds in connection with the renewal of the Advisory Agreement (the "Broadridge Report"). The Broadridge Report included metrics on risk analysis, volatility versus total return, net total return and performance consistency for the Funds and a universe of comparable funds. Based on the materials considered and discussed at the meeting, the Trustees found Fund performance satisfactory, or, where performance was materially below the benchmark and/or peer group, the Trustees were satisfied with the reasons provided to explain such performance. In connection with the approval or renewal of Sub-Advisory Agreements, the Board considered the performance of the Sub-Adviser relative to appropriate indexes/benchmarks. Following evaluation, the Board concluded that, within the context of its full deliberations, the performance of the Funds was sufficient to support renewal of SIMC's Advisory Agreement, and the performance of each Sub-Adviser was sufficient to support approval or renewal of the Sub-Advisory Agreement.

**Fees.** With respect to the Funds' expenses under the Investment Advisory Agreements, the Trustees considered the rate of compensation called for by the Investment Advisory Agreements and the Funds' net operating expense ratio in comparison to those of the Funds' respective peer groups. In assessing Fund expenses, the Trustees considered the information in the Broadridge Report, which included various metrics related to fund expenses, including, but not limited to, contractual management fees at various asset levels, actual management fees (including transfer agent expenses), and actual total expenses for the Funds and a universe of comparable funds. Based on the materials considered and discussion at the meeting, the Trustees further determined that fees were either shown to be below the peer average in the comparative fee analysis, or that there was a reasonable basis for the fee level. The Trustees also considered the effects of SIMC's and its affiliates' voluntary waivers of management and other fees to prevent total Fund operating expenses from exceeding any applicable cap, as well as SIMC's and its affiliates' contractual waiver of their management and other fees with respect to the Government, Government II and Treasury II Funds to prevent total Fund operating expenses from exceeding a specified cap, and concluded that SIMC, through waivers, has maintained the Funds' net operating expenses at competitive levels for its distribution channels. In determining the appropriateness of fees, the Board also took into consideration the impact of fees incurred indirectly by the Funds as a result of investments into underlying funds, including funds from which SIMC or its affiliates earn fees. The Board also took into consideration compensation earned from the Funds by SIMC or its affiliates for non-advisory services, such as administration, transfer agency, shareholder services or brokerage, and considered whether SIMC and its affiliates may have realized other benefits from their relationship with the Funds, such as any research and brokerage services received under soft dollar arrangements. When considering fees paid to Sub-Advisers, the Board took into account the fact that the Sub-Advisers are compensated by SIMC and not by the Funds directly, and that such compensation with respect to any unaffiliated Sub-Adviser reflects an arms-length negotiation between the Sub-Adviser and SIMC. Following evaluation, the Board concluded that, within the context of its full deliberations, the expenses of the Funds are reasonable and supported renewal of the Investment Advisory Agreements. The Board also considered whether the Sub-Advisers and their affiliates may have realized other benefits from their relationship with the Funds, such as any research and brokerage services received under soft dollar arrangements.

**Profitability.** With regard to profitability, the Trustees considered compensation flowing to SIMC and the Sub-Advisers and their affiliates, directly or indirectly. The Trustees considered whether the levels of compensation and profitability were reasonable. As with the fee levels, when considering the profitability of the Sub-Advisers, the Board took into account the fact that compensation with respect to any unaffiliated Sub-Adviser reflects an arms-length negotiation between the Sub-Adviser and SIMC. In connection with the approval or renewal of each Sub-Advisory Agreement, the Board also took into consideration the impact that the fees paid to the Sub-Adviser have on SIMC's advisory fee margin and profitability. Based on this evaluation, the Board concluded that, within the context of its full deliberations, the profitability of each of SIMC and the Sub-Advisers is reasonable and supported renewal of the Investment Advisory Agreements.

**Economies of Scale.** With respect to the Advisory Agreement, the Trustees considered whether any economies of scale were being realized by SIMC and its affiliates and, if so, whether the benefits of such economies of scale were passed along to the Funds' shareholders through a graduated investment advisory fee schedule or other means, including any fee waivers by SIMC and its affiliates. The Trustees recognized that economies of scale are difficult to identify and quantify and are rarely identifiable on a fund-by-fund basis. Based on this evaluation, the Board determined that the fees were reasonable in light of the information that was provided by SIMC with respect to economies of scale.

Based on the Trustees' deliberation and their evaluation of the information described above, the Board, including all of the Independent Trustees, with the assistance of Fund counsel and Independent Trustees' counsel, unanimously approved the approval or renewal, as applicable, of the Investment Advisory Agreements and concluded that the compensation under the Investment Advisory Agreements is fair and reasonable in light of such services and expenses and such other matters as the Trustees considered to be relevant in the exercise of their reasonable judgment. In the course of its deliberations, the Board did not identify any particular factor (or conclusion with respect thereto) or single piece of information that was all-important, controlling or determinative of its decision, but considered all of the factors together, and each Trustee may have attributed different weights to the various factors (and conclusions with respect thereto) and information.
